

Course Materials for CSc 335 in Spring 2015

We will require software and texts, as follows.

1. Software for Scheme

Scheme is available via the Racket website, at <http://racket-lang.org/>

The installation for all of Linux/Mac/Windows is described in detail on the website; the installation of Racket sets up an IDE (drracket) automatically.

2. Course Texts

1. Structure and Interpretation of Computer Programs, Abelson and Sussman, <http://mitpress.mit.edu/sicp/>
2. The Little Schemer, Friedman and Felleisen, <http://mitpress.mit.edu/books/little-schemer>

Additional materials may be suggested as the course progresses.
